Abstract (en)

[origin: WO2022171443A1] The invention relates to an anchor fastening aid for supporting and/or monitoring an anchor fastening procedure, comprising a housing, in which an electronic unit is arranged, the electronic unit comprising a sensor unit and a communication interface for transmitting information. It is proposed that the anchor fastening aid comprises a connection unit which is designed to connect the anchor fastening aid to a hand-held machine tool or an insertion tool.
