Abstract (en)
[origin: WO2022171398A1] The invention relates to a method for operating an operating device (10) for a motor vehicle, in which a first user input, represented by touching a touch-sensitive surface (18) of a screen unit (16), is received which characterises a selection of a selection level (26), wherein a first selection level (26) provides different settable driving modes (28) as list members (32) and a second selection level (26) provides different settable ambiance modes (30) as list members (32), a second user input, represented by turning, about an axis of rotation, a ring element (22) which is arranged to surround the screen unit (16) circumferentially, is received which characterises a selection of a list member (32) from a plurality of list members (32) at the selected selection level (26), and a control signal is provided by means of a control unit (24) depending on the first user input and/or the second user input, which control signal characterises a driving mode to be set and/or an ambiance mode to be set of the motor vehicle and by means of which a display of the driving mode (34) and/or the ambiance mode (36) by means of the screen unit (16) is triggered.
