Abstract (en)  
[origin: WO2022171832A1] The invention relates to an adapter (6) for attaching a wiper blade (2) in an arm (4) of a wiping system (1), the adapter (6) being configured to be pivotally mounted about an axis of rotation (R) on a connector (8) of the wiper blade (2), the adapter (6) comprising at least one means (40) for rotating the adapter (6) relative to a connector (8) formed on the side walls (18a, 18b), the rotating means (40) comprising at least one bearing (42) which is open towards the receiving space (20), the adapter (6) being characterized in that the bearing (42) has at least three points (46) which are configured to bear against the connector (8), the three points (46) being separated from one another by material-free angular sectors (48).
