Abstract (en)

[origin: WO2022171521A1] The invention relates to a system (20) for attaching insulating elements (16) to structural elements (12, 14) in motor vehicles, comprising a plurality of insulating elements (16) which are provided in at least one stack (1). The system (20) further comprises at least one structural element (12, 14) of a motor vehicle and a robot (8). The robot (8) is designed in such a manner that it can remove in each case a single insulating element (16) from the stack (1) and arrange it at the structural element (12, 14).
