Abstract (en)
[origin: CA3208423A1] The present invention relates to a method for producing a filler for paper, comprising the steps of providing floatation tailings from paper reprocessing, the floatation tailings containing titanium dioxide; mechanically and/or chemically treating said floatation tailings; and mixing the mechanically and/or chemically treated floatation tailings with titanium dioxide. The invention further relates to the filler obtainable according to said method, a paper containing said filler and the use of such a paper as a decorative paper. 10
