Abstract (en)
To provide a microwavable pouch capable of reliably ensuring a large opening in the slit during microwave heating. Provided is a microwavable pouch (10) in which an automatic steam venting mechanism (20) includes a steam venting sealing portion (30), a slit (50) and a flap piece (41), the slit (50) includes a slit intermediate portion (52) formed toward a region closer to a seal peeling start portion (31) than a pair of slit end portions (51), and the automatic steam venting mechanism (20) further includes an unsealed portion (41) formed to cover the entire periphery of the slit (50) and a control sealing portion (70) formed by heat-welding a part of the flap piece (41) to a second film (12).
