Abstract (en)  
[origin: WO2022177486A1] The present disclosure relates to a method for a robotic work tool system (220). The method comprises receiving (S100) a request for assistance from a first outdoor robotic work tool (100a) that at present is not operational and acquiring (S200) position data for the first outdoor robotic work tool (100a). The method further comprises controlling (S300) a second outdoor robotic work tool (100b) to move towards the position of the first outdoor robotic work tool (100a), and controlling (S400) the second outdoor robotic work tool (100b) to acquire camera images of the first outdoor robotic work tool (100a) using a camera device (171).
