Abstract (en)
[origin: WO2022175343A1] The invention relates to an acquisition kit comprising: ■ a mobile telephone (12); ■ a mobile telephone holder (14) comprising: - a spacer (24) opening via an oral aperture (Oo), intended to be inserted into the user's mouth, and via an acquisition aperture (Oa'), and - an adapter (26) fastened to the spacer (24) and defining, with the spacer (24), a chamber (28) opening via the oral aperture (Oo) and via an adapter aperture (Oa), the adapter comprising a base (50) to which the mobile telephone is rigidly but removably attached in an acquisition position in which the objective lens (16) of the mobile telephone has an at least partial view of the oral aperture (Oo), through the adapter aperture (Oa) and the acquisition aperture (Oa'). In said kit, the adapter aperture (Oa) is laterally offset relative to a clamping zone (71) for clamping the mobile telephone (12) onto the adapter (26), the clamping zone (71) consisting of the set of points to which the adapter exerts a clamping force on the mobile telephone (12).
