Abstract (en)

[origin: WO2022175024A1] The invention relates to a controller (110) for a vehicle (100) with a steering device (102) comprising a pump device (104), which includes a pump (112) and an electric motor (118), further comprising a transmission device (106) and the controller (110). The controller is designed to provide the electric motor (118) with a motor signal (140) for operating the electric motor (118) in order to cool the electric motor (118) in a normal operating phase of the steering device (102).
