Abstract (en)
[origin: WO2022175823A1] The present invention relates to a ventilation hood, in particular a self-cleaning ventilation hood intended for professional use and comprising filtration means (5) housed in a plenum (4), which is substantially closed in its lower part. The plenum (4) comprises at least two openings (3) on the outside of the hood, through which openings the air is drawn into the plenum (4) and through the filtration means (5), said at least two openings being located at different heights with respect to the vertical axis of the ventilation hood.
