Abstract (en)

[origin: WO2022214321A1] The invention relates to an apparatus (1) for preserving beverages, comprising a measuring device (2), which is suitable and intended for determining a flow rate of a liquid flowing through a beverage line (10), and comprising a pump device (4), which conducts a preserving agent and in particular dialkyl dicarbonates into the beverage line, wherein a conducting line is provided, which opens into the beverage line (10) and the pump device conducts the dialkyl dicarbonates through this conducting line, and wherein the pump device (4) can be controlled depending on a flow rate determined by the measuring device (2), characterised in that the pump device (4) is in the form of a reciprocating pump.
