Abstract (en)
[origin: WO202207150A1] Disclosed is an operating table (100) comprising a load sensor assembly (102) with a plurality of load sensors for measuring at least one variable from which a load acting on the load sensor assembly (102) can be ascertained, the load sensor assembly (102) being arranged between at least two parts of the operating table (100), said at least two parts essentially not being movable relative to one another.
