Abstract (en)

[origin: CA3211482A1] The invention relates to a container for a sample. The aim of the invention is to improve an optical or spectroscopic examination of a sample stored in the container. This aim is achieved in that a container is provided which comprises: a base portion, a container axis being oriented perpendicularly to the base portion; a first wall portion, the first wall portion adjoining the base portion; and a second wall portion, the second wall portion adjoining the first wall portion, and the second wall portion being inclined through at least 20° relative to the container axis.
