Abstract (en)  
[origin: WO2022180079A1] The invention relates to a sleeve-shaped outer part (12) formed from a blank cut (13), the blank cut (13) being wound to form a jacket and end portions (14, 15) being connected to each other in an overlapping region (16) by means of an adhesive layer (48). The adhesive layer (48) is designed in such a way that the first end portion (14) and the second end portion (15) in the overlapping region (16) are again releasable from the state in which they are coupled to each other.
