Abstract (en)

[origin: WO2022179804A1] The invention relates to a lifting device (10), in particular for a transport vehicle, comprising a fixed spindle (4), an inner spindle nut (5) which is rotatable relative to the fixed spindle (4), a movable spindle (6) and an outer spindle nut (7) which is rotatable relative to the movable spindle (6), the inner spindle nut (5) being connected to the movable spindle (6) in a rotationally fixed, in particular rigid, manner. The invention also relates to a transport vehicle, in particular a driverless transport vehicle, comprising a drive device, an electrical energy store for supplying the drive device, a control device for controlling the drive device and a lifting device (10) according to the invention.
