Abstract (en)

[origin: WO2022179844A1] The invention relates to a locking device for locking a rechargeable battery pack with a consumer, comprising a rechargeable battery pack interface for releasably connecting the locking device to the rechargeable battery pack along a connecting direction, wherein the rechargeable battery pack interface has a receptacle, in which the rechargeable battery pack is at least partially arranged in the connected state, and at least one movably mounted locking element. The invention proposes that the locking element is always movable in the unconnected state and/or is preloaded with a force counter to the connecting direction in the connected state.
