Abstract (en)
[origin: CN220433257U] The utility model provides an ironing and/or ironing household appliance, which comprises an evaporation chamber (3) with a vaporization surface, water is injected on the vaporization surface to generate steam; and a steam distribution circuit allowing the flow of steam to be transported towards the at least one steam outlet hole (10A), the steam distribution circuit comprising at least one retention means for retaining scale, for retaining at least a portion of scale particles transported by the flow of steam in the cavity (51); and a scale discharge orifice (50) for discharging the scale trapped in the cavity (51), closed by a removable plug (13) accessible from outside the household appliance, characterized in that the household appliance comprises a self-cleaning device allowing the self-cleaning device to clean the vaporizing surface of the vaporizing chamber (3) after the vaporizing surface has reached a set temperature above 150 DEG C, so that the vaporizing surface of the vaporizing chamber (3) has reached a set temperature above 150 DEG C, and the vaporizing surface of the vaporizing chamber (3) has reached a set temperature above 150 DEG C. A large amount of water is suddenly sent to the vaporization surface of the evaporation chamber (3).
