Abstract (en)

[origin: FI20225619A1] A ventilation system and a ventilation control system, comprising a central unit (1) configured to transmit signals to and receive signals from a ventilation device (3), a user interface unit (2) communicatively connected to the central unit (1), wherein the central unit (1) is configured to cause i) the ventilation device (3) to initiate ventilation in response to receiving a first user input via the user interface unit (2), ii) the ventilation device (3) to initiate smoke removal after a predetermined time from initiating the ventilation in response to receiving said first user input if the ventilation is functional, and iii) the ventilation device (3) to initiate smoke removal in response to receiving a second user input via the user interface unit (2) if the ventilation is dysfunctional.
