Abstract (en)
[origin: WO2022184474A1] The invention relates to a method for producing elongate brushes, in particular brooms, and to a corresponding brush drilling and stuffing machine, wherein a carousel (12) is used, on which a plurality of holders (16) for brush bodies (18) are mounted. The brush bodies (18) are fastened in such a way that their direction of width (B) is oriented in the circumferential direction of the carousel (12). The movement in the direction of width (B) is carried out by two separate rotational axes (14, 34).
