Abstract (en)

[origin: WO2022187181A1] Provided herein, in some embodiments, are engineered nucleic acid targeting vectors that include a sequence of interest flanked by homology arms, each homology arm comprising a sequence homologous to a sequence in a safe harbor site in the human genome in any one of the following loci: lq31, 3p24, 7q35, and Xq21. Also provided herein are methods of using and compositions the comprising engineered nucleic acid targeting vectors.
