Abstract (en)

[origin: WO2022184481A1] The invention relates to an impact protection device (3) for an injection system (4) of an internal combustion engine (2), the protection device (3) having a body (5) and a coupling member (6), connected to the body (5), configured to extend in engagement with the injection rail (41) so as to ensure permanent contact with at least one flat surface of the injection rail (41) and to prevent the movement thereof relative to at least one injector of an engine (2).
