Abstract (en)

Provided is a non-combustion heating flavor inhaler with reduced loss of a flavor component within the aerosol channel. The non-combustion heating flavor inhaler includes: an aerosol source containing a compound represented by formula (1) where  $R_{1}$ ,  $R_{2}$ , and  $R_{3}$  are each independently an alkyl group of 3 to 6 carbon atoms; and an atomizing means for generating an aerosol through atomization of the aerosol source.
