Abstract (en)
Described herein is a filling unit (10), in particular for filling containers with a liquid, preferably cartridges for electronic cigarettes. The filling unit comprises:- a nozzle (6) for dispensing a product;- a supporting base (2) having at least one housing seat (4) configured to receive the nozzle (6);- a blocking member (24) mobile between an operative position, in which said blocking member (24) prevents extraction of said nozzle (6) from said housing seat (4), and an inoperative position, in which said nozzle (6) can be extracted from said housing seat (4); and- a fastening member (26) for fixing said blocking member (24) in said operative position, said fastening member (26) comprising a gripping portion (26A) provided for manual command without the use of tools of said fastening member (26).
