Abstract (en)

[origin: WO2022190144A1] A space-saving device for lids is disclosed comprising a support structure that engages a pin (3) provided for receiving a series of lids (5) and at least one knob (6) provided for engaging any of the lids placed on the pin (3). The space-saving device is set up to operate from a rest position in which the lids are placed on the pin (3) and are inactive at an operating position in which the lid is removed from the pin and engaged on the knob (6) to be grasped by an operator and used to cover a saucepan, a pan, etc.
