Abstract (en)  
[origin: WO2022189622A1] The invention relates to a beverage preparation machine (1) for preparing a beverage by means of a cartridge system consisting of a cartridge (7), which has a beverage substance in a reservoir (8), and of a cartridge receptacle (11) which is connected to the cartridge (7) and has a mixing chamber, at least one fluid supply and a beverage outlet, wherein the beverage preparation machine (1) comprises a main unit (2) and a cartridge holder (3) which protrudes from the main unit (2) and is in particular designed like a balcony, wherein the cartridge holder (3) is designed such that the cartridge system can be inserted into it, wherein the cartridge holder (3) comprises an actuator element (14) for operating a cartridge discharging device of the cartridge system, wherein the main unit (2) comprises a liquid reservoir (4), a liquid conditioning system for conditioning a liquid from the liquid reservoir (4), in particular for controlling the temperature of and/or carbonating the liquid, a fluid supply system for introducing the conditioned liquid and/or pressurised air into the cartridge system, and a control device for controlling the liquid conditioning system and/or the fluid supply system, wherein the main unit (2) and/or the cartridge holder (3) comprises a drive for the actuator element (14).
