Abstract (en)

[origin: WO2022189404A1] The invention relates to a UWB anchor (22a-c), comprising a first UWB antenna (24a-c) for communication with a first mobile unit (14) and a second UWB antenna (26a-c) for communication with a second mobile unit (16). The UWB anchor (22a-c) is preferably designed for communication in different frequency bands. The UWB anchor (22a-c) can be part of a locating system (12). The invention also relates to a method for locating two different mobile units (14, 16) by means of UWB anchors (22a-c) having two different UWB antennas (24a-c, 26a-c).
