Abstract (en)

[origin: WO2022188929A1] In order to provide a method for controlling transportation vehicles of a transportation system which permits an energy- and cost-efficient operation of said transportation system, the invention proposes a method comprising the following: making available a plurality of transportation vehicles of the transportation system; specifying a transportation task for the transportation of one or more transportation objects; determining a transportation task data record for controlling a transportation vehicle while the transportation task is being performed; performing the transportation task.
