Abstract (en)
[origin: WO2022189487A1] The invention relates to a modular component (100) for a movable part (201) of a vehicle (200), comprising: a carrier housing (10) for fastening the modular component (100) to the movable part (201) of the vehicle (200); a keypad unit (20) for actuating the movable part (201) of the vehicle (200), the keypad unit (20) having a keypad cap (21) which is designed to pick up an activating action, in particular touching and/or exertion of force, by a user, and an activating element (24) being arranged on the keypad cap (21) in order to be able to register a presence and/or an activating action of the user; and an electronics unit (30) for providing lighting functions and/or sensor functions during actuation of the movable part (201) of the vehicle (200), the electronics unit (30) being fastened to the carrier housing (10), the electronics unit (30) comprising a sensor unit (31, 32) for registering a presence and/or registering an activating action on the activating element (24), and the electronics unit (30) comprising at least one luminaire (33) for illuminating the keypad cap (21).
