Abstract (en)

[origin: WO2022207602A1] The invention relates to a device (2) for establishing an interlock connection, comprising a plug assembly (4) and a circuit carrier (6), the plug assembly (4) having two plug terminals (8, 10) with in each case at least one associated interlock contact (12, 14), wherein a structural element (22) for mechanical reinforcement of the circuit carrier (6) is arranged on the circuit carrier (6), wherein the structural element (22) is a pot-shaped housing part, and the structural element (22) having a contact element (24) for electrically contacting the interlock contacts (12, 14).
