Abstract (en)

A method to convert a jet board (200), which may include an electric surfboard, an electric standup paddle board, an electric hydrofoil board, into a personal watercraft (PWC). The method includes attaching an add-on module (100) onto the jet board (200) where the add-on module (100) provides a handlebar (162) and a seat (112) but does not provide a source of propulsion. The resulting personal watercraft (800) is, instead, driven by the propulsion system of the jet board (200).
