Abstract (en)

A side panel of a facade blind box in a form of a plate comprising at the internal box side a plurality of protruding over the plate and permanently connected therewith mounting, setting and guiding elements in a form of guides creating a slot tapering in the upper zone. The mounting elements in a form of pins with openings and the setting elements are grouped in subsequent and interconnected modules (1, 1', 1", 1'''), and between particular modules is made a recess. In the lower section the side panel comprises two bolts (3) deployed beyond the side panel plate and located at the left and right side of the panel.
