Abstract (en)

[origin: WO2022194931A1] The invention relates to a method (100) for producing an attractant composition (120) and to an attractant composition (120) for attracting blood-sucking arthropods (31) and/or fruit flies. According to the invention, a porous carrier material is charged with a buffer system, the buffer system being at least largely completely absorbed by the porous carrier material. An attractant is subsequently introduced into the carrier material that is charged with the buffer system.
