Abstract (en)
[origin: WO2022195636A1] Postural sitting system comprising a seat (1), at least one footrest (3), at least one armrest (4), wherein the seat is formed by a base (10) comprising a lower side (13) and an upper side (12) and two femoral sections (11D, 11S) on the upper side of the base (10), with the possibility of rotating by an angle (J) around an axis perpendicular to the base (10), and on whose external side are mounted two femoral containment surfaces (110, 111). The seat (1) comprises at least two front attachments (A, B) on the external part of at least one of said femoral containment surfaces (110, 111), one of which front attachments is configured to connect the footrest (3) to it, while another front attachment is configured to allow the armrest (4) to be connected to it; and a rear attachment (C) on the outer side of the seat, in a rearward position, and also configured to allow the armrest (4) to be connected to it.
