Abstract (en)
[origin: WO2022192928A1] The invention relates to a method for producing a stabiliser composition for a polymer, particularly a polymer containing halogen such as polyvinyl chloride, in which components for forming the stabiliser composition are mixed in an extruder and continuously discharged therefrom. According to the invention, an impact modifier is admixed. The invention also discloses a correspondingly produced stabiliser composition and the use of a planetary roller extruder (1) to produce a stabiliser composition.
