Abstract (en)
[origin: CA3212473A1] The subject matter of the invention is a method for treating human or animal urine, comprising the implementation of the following steps: - a step of basifying the urine in such a way that the urine has a pH of greater than or equal to 9, - a step of filtering the urine, - a step of transforming the urine by fermentation. The invention also relates to the transformed urine obtained and to the coproducts of this method, and also to the uses thereof, in particular as fertilising substance.
