Abstract (en)
A nozzle assembly (9) for painting gun (3), said nozzle assembly (9) comprising a nozzle (10) and a spray head (11), the nozzle (10) comprising a hollow tubular body along a longitudinal axis (A) and provided with a coupling portion (10a) configured to allow connection of the nozzle (10) to a body (4) of the painting gun (3) and an end portion (10b) defining an opening (8) fluidically connected to a source of painting fluid of the gun (3), the spray head (11) comprising a hollow main body housed around the nozzle (10) along the axis (A) and comprising a coupling portion (11a) configured to allow connection of the spray head (11) to the body (4) and an end portion (11b) defining with the nozzle a chamber (25) and an opening (21) fluidically connected to the chamber (25), the nozzle (10) and the spray head (11) being optimized to mix pressurized air and painting fluid in an optimal manner.
