Abstract (en)
A household appliance with a pump-valve assembly comprising a first body, a second body creating a chamber and having an inlet, a first outlet, a second outlet and an impeller for transporting fluid, wherein the pump-valve assembly is driven by a motor, wherein the impeller has a shaft and a first set of blades and a second set of blades placed coaxially on the shaft. The present invention enables a household appliance in which the operation is controlled by a pump-valve assembly driven by a BLDC or DC motor in easy, automatic, and reliable way.
