Abstract (en)

[origin: US2022312896A1] An article of footwear has a footwear upper that includes a base layer defining a throat opening, a tongue having a forward end fixed to the base layer forward of the throat opening, and a strap having an anchored end fixed at the base layer and a securing end selectively securable at the base layer. The tongue is pivotable about the forward end between an access position and a use position, extends over and covers the throat opening in the use position, and rests against an exterior of the base layer at a medial side of the base layer and at a lateral side of the base layer in the use position. The strap crosses over an exterior of the tongue with the securing end secured at the base layer and the tongue in the use position.
