Abstract (en)
[origin: WO2022208334A1] A washing agent dispensing unit has a dispenser body (11), designed for mounting at a through-opening of a mounting wall of a dishwasher tank. The dispenser body (11) has a rear body part (11') and a front body part (11'') which has a greater perimeter encumbrance than the rear body part (11'). The dispenser body (11) has, at a peripheral profile of the rear body part (11'), first fixing elements (16), for fixing the dispenser body (11) with respect to an inner side of the mounting wall (5). The dispensing unit (10) further comprises a covering element (30), configured to cover at least partially a peripheral profile of the front body part (11''), and between the covering element (30) and at least one of the peripheral profile and the upper face of the front body part (11'') second fixing elements are provided (17, 18, 34, 35, 36), for fixing the covering element (30) to the front body part (11'').
