Abstract (en)  
[origin: WO2022200419A1] The disclosure relates to a medical sterile goods container and a device setup for documenting a content and a location of the sterile goods container, comprising the sterile goods container, a transport or storage device and a holding device insertable into the sterile goods container. The sterile goods container is provided with at least one first identification element that is identifiable by an identifier and able to be read digitally, said first identification element being located on an outside of the sterile goods container, and with at least one second identification element that is identifiable by an identifier and able to be read digitally, said second identification element being located on an inside of the sterile goods container, with the identifier of the first identification element of the sterile goods container corresponding to the identifier of the second identification element of the sterile goods container.
