Abstract (en)

[origin: WO2022200308A1] The invention relates to a device (1) for recycling building material (2) containing a base material and a binder, comprising a receiving container (3, 3a, 3b) for the building material (2), wherein a high-pressure water jet (5) can be applied to the building material (2) in the receiving container (3, 3a, 3b) through at least one nozzle (4) in order to separate the binder from the base material. The invention further relates to a method for recycling building material (2).
