Abstract (en)

[origin: WO2022207638A1] The present invention discloses a method for placing a call for a lift system. The method (10) comprises: - a mobile communication device (52) which is carried by a user (50) of the lift system (10), - a beacon (20) of the lift system (10) which is designed to emit a beacon signal (22), and - a controller (28) of the lift system (10), wherein the method comprises the following steps of: - capturing the beacon signal (22) by means of the mobile communication device (52), - recognizing a gesture of the user (50) by means of the mobile communication device (52), - identifying an intention of the user to use the lift system (100), wherein the recognized gesture and the captured beacon signal (22) are used for this purpose, - displaying a user interface on the mobile communication device (52) for the purpose of sending a call, and - sending the call to the controller (28) of the lift system (10).
