Abstract (en)

[origin: WO2022200176A1] The present invention relates to a method for producing polyurethane foams by reacting component A containing A1 an isocyanate-reactive component, A2 blowing agent containing water, A3 optionally auxiliary agent and additive, A4 a compound having the formula P[-O-C(O)-CH<sub>2</sub>-C(X)-R<sub>1</sub>]<sub>n</sub> (I), wherein P stands for a polyether polyol having an OH functionality of 2 to 8 and a number-average molecular weight of 200 to 4000 g/mol, measured in accordance with DIN 55672-1 from August 2007, X stands for =O or =N-R<sub>2</sub>, R<sub>1</sub> and R<sub>2</sub> stand, independently of each other, for a substituted or unsubstituted C<sub>1</sub> to C<sub>8</sub> alkyl group or a substituted or unsubstituted aryl group and n stands for the number of OH groups of P which are replaced by the group -O-C(O)-CH<sub>2</sub>-C(X)-R<sub>1</sub> and is at least 1, with component B, an isocyanate component containing toluene diisocyanate, diphenylmethane diisocyanate, polyphenyl polymethylene polyisocyanate or mixtures of said compounds, at an isocyanate index of 100 or less. The invention also relates to polyurethane foams according to the method, to the use of the polyurethane foams and to the use of the component A4.
