Abstract (en)
[origin: WO2022207253A1] A multi-unit multi-plate clutch arrangement having at least two friction clutches (K1, K2, K0) which have plate assemblies, which are arranged offset radially with respect to one another, on plate carriers (9, 10, 11, 12) which are connected to clutch outputs (63, 64) and to a clutch basket (60) as a drive, having pistons (13, 14, 15) which serve to actuate the friction clutches (K1, K2, K0), wherein at least the clutch basket (60) and the clutch outputs (63, 64) are composed of sheets and are held both axially and radially by axial bearings (33A, 33B, 33C, 33D, 33E) and radial bearings (34A, 34B, 34C) which run on sheet-metal surfaces and are braced against sheets.
