Abstract (en)
[origin: WO2022200739A1] The invention relates to a system for searching for a target beacon (BC) attached to an object or to a living being to be located comprising said target beacon (BC) emitting a target radio signal in an emission range (P) and a detection device (F) capable of detecting the target radio signal (SC) emitted by the target beacon (BC), and to the method for searching for the corresponding target beacon (BC).
