Abstract (en)
A tubular sleeve comprising: a distal end opposite a proximal end; a cutout formed through the tubular sleeve proximate to the distal end, the cutout defined in part by a first cutout edge and a second cutout edge, wherein the first cutout edge is positioned across the cutout from the second cutout edge; a first panel having at least a first side edge, a second side edge and a trailing edge, the first side edge affixed to the tubular sleeve at a first seam extending along the first cutout edge, the second side edge affixed to the tubular sleeve at a second seam extending along the second cutout edge; a second panel having at least a first side edge, a second side edge, a leading edge and a trailing edge, the first side edge affixed to the tubular sleeve at the first seam and the second side edge affixed to the tubular sleeve at the second seam such that the leading edge of the second panel overlaps the trailing edge of the first panel; and a third panel having at least a first side edge, a second side edge and a leading edge, the first side edge affixed to the tubular sleeve at the first seam and the second side edge affixed to the tubular sleeve at the second seam such that the leading edge of the third panel overlaps the trailing edge of the second panel.
