Abstract (en)

Provided in the present application are a telescopic fixing rod assembly for a shower door, and a shower door including the fixing rod assembly. The fixing rod assembly comprises: a first fixing rod (10); a connecting body (30), where a first end of the connecting body is slidably connected to the first fixing rod, so that the connecting body can move relative to the first fixing rod along a longitudinal axis of the first fixing rod; a second fixing rod (20), wherein the second fixing rod is connected to a second end of the connecting body that is opposite the first end; and a clasper, which is detachably fixed to the connecting body or the second fixing rod. In the fixing rod assembly provided in the application, a door clamping position is adjusted by means of a slidable connection between the connecting body and the first fixing rod, such that a mounting posture of the shower door can be flexibly adjusted while the stability of the fixing rod assembly is ensured.
