Abstract (en)

The invention relates to a door for lockers or cabinets with limited access, in particular post office boxes. The door (1) comprises the front panel (2) with the lighting element (7), as well as the side walls (3), wherein at least in the side walls (3) there are holes (4) for articulated connection of the door with the body of the locker. The door (1) also has the rear panel (5), wherein between the front panel (2) and the rear panel (5) at least one body (8) with an at least partially transparent front face is placed. The body (8) is embedded in the through holes in the front panel (2) and rear panel (5). Inside the body (8) there is a lighting element (7) connected to the power supply and control.
