Abstract (en)
Disclosed herein is a cooking appliance. In the cooking appliance, a housing is coupled to a second front panel being disposed at a front of an electronic component space, the housing accommodating a water tank is coupled to the second front panel, the second front panel has an access hole for allowing the water tank to come in and out, and the second front panel and the housing are coupled in a way that an open front surface of the housing connects to the access hole.
