Abstract (en)
A door for a refrigerator and a refrigerator. The refrigerator door comprises a door body and a handle. The handle is detachably installed on an end portion of the door body, and different purposes can be achieved by installation/removal of handles having different functions. The inside of the handle is provided with a light board assembly, and the handle is provided with a plurality of light-transmitting holes, such that a user can see the exact position of the refrigerator handle even in the dark environment. In addition, the intensity of light emitted by the refrigerator handle is limited and will not cause irritation to the user's eyes.
